WILDSUN K9 WASH

Multi Sources 9 Series

013940

The new WILDSUN K9 WASH is a highly evolved variant of the WILDSUN K25 TC, specially geared to shooting TV video and broadcasting in high-definition. With a brand new sleek design and a visual footprint 21% smaller, its weight has been drastically reduced by 26%, allowing for better integration. This unique LED luminaire measures up to the classic Fresnel HMI 4000 lights in terms of pure output. Fitted with 217 next-generation high-output LEDs, the luminaire delivers more than 60,000 lumens of overall output with 40% less energy consumption. No lamp replacement is necessary. Producing extremely high-quality light without flickering, this luminaire achieves a colour temperature perfectly calibrated at 5700K and a colour rendering index greater than 92. WILDSUN K9 WASH is particularly suitable for sporting events, fashion shows, car shows, or any prestigious events requiring powerful, high-quality light and perfectly rendered colour.

WILDSUN K9 WASH is a powerhouse of technology and innovation. With the same basic specifications as WILDSUN K25 TC, it is equipped with powerful tri-phase stepper motors that allow fast, accurate and silent positioning. AYRTON developed special silicone-based high-output optics for this projector, ensuring perfect stability over time. Its optical zoom has a 5:1 ratio with a zoom range of 12° to 60°. Luminous intensity can be fine-tuned using a precision electronic dimmer, for even greater flexibility of use. The light fixture output is equipped with a protective holographic filter in polycarbonate and an honeycomb system to prevent glare. The user can control each concentric circle individually to adjust the luminaire's power accordingly or create dynamic effects for stage lighting.
